DETAILED ACTION

1. Receipt of the papers filed on January 3, 2006, is acknowledged. Claims 8-16 are pending.

2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim Rejections - 35 USC § 112

- 3. Claims 8-16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
- 4. Claim 8 recites that the drive unit is operatively coupled to the workpiece holder to rotate the workpiece about an axis "normal to the workpiece." This limitation is indefinite because it relates the structure of the apparatus to a configuration of the workpiece being treated by the apparatus. The workpiece is not an element of the apparatus itself. The workpiece may have any configuration such as planar, tubular, spherical, etc. It is not possible to determine the direction of an axis normal to the workpiece. Note MPEP 2115. Dependent claims are rejected for the reasons given with respect to the claim upon which they depend.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

Application/Control Number: 10/811,710 Page 3

Art Unit: 1742

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

- 6. Claims 8-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Barton (3,607,712).
- 7. Barton discloses electroplating apparatus. The horizontal structure shown in figure 5 upon which the barrel assemblies 42 are mounted may be considered to be a deck. Tanks 16 are processing vessels configured to receive an electrochemical processing liquid. Barrels 42 are workpiece supports. Mounting structure of the barrels is attached to the deck. As shown by the arrows in figures 6, a drive unit is operatively coupled drive sprocket 73 to rotate the barrel 42 about an axis. The workpiece support is at or above the deck. All elements recited in claim 8 are disclosed by Barton.
- 8. With respect to claim 9, the workpiece support is configured to move the workpiece vertically as shown in figures 7 and 8. Figures 7 and 8 additionally show the rotation of the workpiece support about a rotation axis. With respect to claim 11 the processing vessel 16 extent the deck. With respect to claim 14, the electrical current is carried to the workpiece through the lift-arm assembly (column 5, lines 13-15). See figure 6 which shows a dongle extending from the lift-arm assembly into the barrel.
- 9. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO

Application/Control Number: 10/811,710 Page 4

Art Unit: 1742

MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to William T. Leader whose telephone number is 571-272-1245.

The examiner can normally be reached on Mondays-Thursdays and alternate Fridays, 7:30-4:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Roy King, can be reached on 571-272-1244. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
